THE GOLD STANDARD OF SPREADER SPRAYERS

THE TRIUMPH IS THE ONE MACHINE YOU CAN USE EVERY DAY FOR ALL OF YOUR ACCOUNTS

THE LATEST FEATURES
Recent Triumph refinements include:

- A tighter turning radius
- Enhanced powered steering
- Wheel weights for added traction
- Revolutionary dry agitation system

STATE-OF-THE-ART INNOVATION
PermaGreens incorporate exclusive, innovative features that make your job easier and more productive. The flagship product, the Triumph Spreader Sprayer, offers a fast return on your investment, making it the preferred choice of professional turf care companies around the world.

TIGHTER TURNING RADIUS
The Triumph features a new “axle-forward” sulky that shortens the wheelbase and enables tighter turns for greater maneuverability.

THE GOLD STANDARD IN MANEUVERABILITY
MORE POWERFUL STEERING, TIGHTER TURNING AND IMPROVED CORNERING

SMARTSTEER™ POWER STEERING
Wheel weights deliver extra traction, stability and cornering to compliment the tighter turning radius.

ADDED TRACTION
The patented SmartSteer™ brake-assist power steering brakes the front wheel on the inside of turns to allow the outside wheel to continue traveling at normal speed. The result is a must-try-to-believe power that assists the operator when carrying heavy loads.

PATENTED ARTICULATING JOINT
The patented articulating joint connecting the front half of the Triumph to the rear sulky provides tight turning, stability and shock absorption on rough ground.

PATENTED DROP-DOWN HANDLEBARS
The patented quick-release, drop-down handlebars provide a safer, easier and more convenient way to operate on hillsides and tough areas by allowing the operator to walk behind the machine. Simply step back onto the sulky and raise the handles to return to the riding position.

TIGHTER TURNING RADIUS
The Triumph features a new “axle-forward” sulky that shortens the wheelbase and enables tighter turns for greater maneuverability.

THE GOLD STANDARD OF SPREADER SPRAYERS
PermaGreens have been the leading spreader sprayer technology for over 20 years. Designed using over 100 years of combined on-the-job experience owning and operating in companies just like yours, PermaGreen is the GOLD STANDARD of spreader sprayers against which all others are measured.

PermaGreens incorporate exclusive, innovative features that make your job easier and more productive. The flagship product, the Triumph Spreader Sprayer, offers a fast return on your investment, making it the preferred choice of professional turf care companies around the world.

The Triumph is available as a spread-only model, with internal plumbing removed. ORDER PART # T000801.2

**TRIUMPH SPREADER FEATURES**

**CONTROLS AT YOUR FINGERTIPS**

- The most commonly used controls can be operated without letting go of the handlebar
- Angled in and adjustable to trim precisely around the property without wasting product on sidewalks and driveways (shown here in the up position)
- When one side of the impeller wears out, flip it over to expose a new platter...now that's smart

**REMTELY-OPERATED ADJUSTABLE DEFLECTOR**

- Remotely-operated adjustable deflector
- 3.5 MPH (LOW GEAR) RATE SETTING
  1. Tighten rate knob at the rate setting
  2. Tighten the rate lock bolt against the rate knob to lock in the setting
  3. Move the rate knob away to spread at 3.5 MPH or back to spread at 5 MPH

- 5 MPH (HIGH GEAR) RATE SETTING
  1. Tighten rate knob at the rate setting
  2. Tighten the rate lock bolt against the rate knob to lock in the setting
  3. Move the rate knob away to clean the spreader or back to spread at 5 MPH

**DUAL-SIDED IMPELLER**

- When one side of the impeller wears out, flip it over to expose a new platter...now that's smart

**A SPREADER THAT NEVER FORGETS ITS SETTING**

If you’re walking or riding on a spreader without pre-set operating speeds, you simply can’t be sure that you’re putting down the correct amount of product every time.

The PermaGreen’s patented application control system goes above and beyond every other spreader in the industry to synchronize and lock in both your spread rate and spray rate to two pre-set ground speeds, 5 MPH and 3.5 MPH.

**FEATUREING:**

- 150-POUND CAPACITY
- INDUSTRY-STANDARD 3-HOLE DESIGN
- REMOTE 3RD-HOLE SHUTOFF
- STEEPLY-SLOPED HOPPER INTERIOR
- ALL CONTROLS AT YOUR FINGERTIPS
  - HOPPER OPEN/CLOSE
  - PATTERN BALANCE
  - DEFLECTOR
- CUSTOM HOPPER COVER
Imagine a spreader that doesn’t clog, gum up, or pile up fertilizer under the impeller...

Locked-Down Screen
As a first line of defense against clogging, a knob pulls the screen down to seal the edges, keeping large clods out while allowing continuous flow

Self-Cleaning Hood
An oscillating cam shakes fertilizer off the hood before it can build up and fall off in clumps. An upgrade kit is available (PART # T10937)

Sprayblocker Shield
The stainless steel spray shield blocks spray drift that would normally attract fertilizer onto the hood, eventually clumping off and creating brown spots

Self-Cleaning Hood
Oscillating claws dig deep into each hole to break through clogs and deliver instant and continuous flow of combination products, fertilizer, seed, lime and salt.

Most ordinary spreaders have a “coffee grinder” rotary agitator that gums up the pattern balancer, throws off calibration, and drops fertilizer off of the hood in clumps.

The new patent-pending BREAKTHRU Agitator System for all PermaGreen and LESCO® 3-hole spreaders goes above and beyond every other spreader in the world to eliminate frustration, wasted time and poor results caused by clogs and fertilizer build-up.

Most ordinary spreaders have a “coffee grinder” rotary agitator that gums up the pattern balancer, throws off calibration, and drops fertilizer off of the hood in clumps.

The stainless steel spray shield blocks spray drift that would normally attract fertilizer onto the hood, eventually clumping off and creating brown spots.

Four Simple Steps to Install:
• Remove old agitator arm
• Place spacers over shaft
• Align BREAKTHRU Agitator
• Tighten set screw

The Gold Standard of Sprayers Synchronized to Two Pre-set Speeds

PermaGreens can spray two widths: Broadcast at 8-Feet and Trim at 3-Feet. There is a pair of broadcast/trim nozzles for High gear and a pair for Low gear. The nozzles are synchronized to deliver the correct amount of spray at two precise ground speeds, eliminating the guessing game and time-wasting adjustments that plague ordinary sprayer spreaders.

Switching between the Broadcast/Trim nozzles for High and Low gear is as simple as pointing the spray selectors to the desired pattern width for the current operating speed.

PermaGreens can spray two widths:

**Case Study of an Actual Company That Uses PermaGreens on 98.6% of Their 1,000 Sq. Ft. to 16 Acre Properties**

**CHOOSE WISELY: PermaGreens**
are the perfect all-around spreader sprayer to build **YOUR** business and **your** dreams upon.

**Important Stats:**
- PermaGreens spread and spray 92% of properties without refilling.
- Another 4% can be treated with only 1 refill.
- 68% of all properties are less than 10,000 ft².
- Only 2.7% of properties require multiple refills.
- Only 1.4% of all the lawns can’t be ridden using a machine.

**LOOK CLOSELY** The case study proves that PermaGreens deliver productivity and practicality across the widest range of property sizes, making the Triumph the perfect all-around spreader sprayer to build your business and your dreams upon.

**CHOOSE WISELY: PERMAGREENS ARE THE PERFECT ALL-AROUND SPREADER SPRAYER TO BUILD YOUR BUSINESS AND YOUR DREAMS UPON**

**FACT:**

**Myth Busted: Triumphs Spread & Spray As Wide Or Wider Than Many Bigger Machines**

**Overall Spray Width**
- Measured from the left-most droplet to right-most droplet.

- **Triumph:** up to 13 feet wide.
- 4 Nozzle Boom Sprayer: 9.5 feet.
- 5 Nozzle Boom Sprayer: 11 feet.

**Myth Busted:**
- TRIUMPHS SPREAD & SPRAY AS WIDE OR WIDER THAN MANY BIGGER MACHINES

**Overall Spread Width**
- Measured from the left-most pellet to right-most pellet.

- **Triumph:** up to 20 feet wide.
- Largest advertised width: 25 Feet.

Even if it were possible to spread 100 feet wide, the on-center distance between passes must be adjusted to match the effective spray width, so that both patterns overlap properly.

**Actual on-center distance between parallel passes:**
- **Triumph:** up to 8 feet.
- 4 nozzle boom systems: 6’ 8”.
- 5 nozzle boom systems: 6’ 4”.

---

**Myth Busted:**
- Bigger machines spread & spray wider than a Triumph.

---

**Choose Wisely Before you risk $10,000 on the myth that a bigger and faster machine is going to make you more money, ask yourself these questions:**

- Does my customer base resemble this case study?
- Is a bigger machine really practical on a majority of my lawns?
- Can I afford to spend $10,000 on a piece of part-time equipment?
MONEY IS MADE ONE DAY AT A TIME. INVEST WISELY AND MAKE EVERY DAY A PERMAGREEN DAY.

MYTH: YOU’LL MAKE MORE MONEY USING A BIGGER SPREADER SPRAYER

In one day, one technician and one PermaGreen™ can spread and spray a 9-Acre school campus in the morning and 20 additional 1,500 ft² to 5,000 ft² residential lawns in the afternoon.

TOTAL PRODUCTION: 455,000 FT²

THIS IS HOW YOU MAKE MORE MONEY THE PERMAGREEN WAY:

• 1 MACHINE
• ALL LAWNS
• EVERY DAY

MYTH BUSTED

MYTH: You’ll make more money using a bigger spreader sprayer

BUSTED

TAKING THE 60-DAY NO RISK CHALLENGE

It’s your future, so don’t just take our word that the Triumph is the most practical and productive machine money can buy. Run a Triumph every day for an entire round (or 60 days). Use it on your toughest accounts, as well as, your smallest and largest properties. Time test it against your fastest machine on the same range of properties. If your PermaGreen doesn’t come out on top or you are not completely satisfied with it for any reason, we’ll buy it back for 100% of the purchase price, including shipping!

*Limit 1 buyback per customer. See permagreen.com for terms and conditions.
EXTENSIVE DEALER/REPAIR NETWORK
PermaGreen has hundreds of dealers and repair centers nationwide, ready to demonstrate the machine and make necessary repairs.

EXPERT TECHNICAL SUPPORT
Receive expert support throughout the life of your PermaGreen™. Our support staff have experience on the assembly line and know every part of your machine.

EXTENSIVE DEALER/REPAIR NETWORK

THE BEST SUPPORT IN THE BUSINESS
EXPERT TECHNICAL SUPPORT AND FAST PART AVAILABILITY
EXPEDITED SPARE PARTS AVAILABILITY
We stock a $15 million dollar parts inventory with next-day delivery capability. Orders placed before 2 PM Central Time receive same-day processing.

EXPERT TECHNICAL SUPPORT
Receive expert support throughout the life of your PermaGreen™. Our support staff have experience on the assembly line and know every part of your machine.

BEST GUARANTEE IN THE INDUSTRY
Every PermaGreen comes with a 60-day buyback guarantee and a 60-month bumper-to-bumper warranty, plus 24 months of coverage on the entire frame against corrosion.

FREE CONSULTATION FROM A PRO
Want to talk about operating a turf care business? So do we! We started out in lawn care with a handful of properties and built our operation to 3,000 accounts. Our staff has over 100 years of combined on-the-job experience owning and operating a business just like yours. We’d love to share our stories of success and the lessons we’ve learned along the way. Call 800.346.2001 x103 for a FREE consultation with our PermaGreen™ Consulting Team.

THE PermaGreen Tactical Handbook contains insightful tips on operating a turf care service in today’s market. This information will help you maximize profits and increase your ability to effectively compete. The Tactics were created by the PermaGreen™ Consulting Team, which has over 100 years of on-the-job turf care service ownership, management and application experience.

OUR GOAL IS TO HELP YOU SAVE AND MAKE MORE MONEY.
PermaGreen™ Tactics can help you:

- MAXIMIZE PRODUCTIVITY to increase cash flow and profits.
- MINIMIZE LABOR COSTS while hiring and retaining the best employees.
- CONTROL PRODUCT COSTS while providing exceptional quality results.
- GAIN AND RETAIN CUSTOMERS through the use of focus marketing.
- CONTROL OVERHEAD using the right equipment and vehicles.
- AND MUCH MORE!

WE KNOW THE CHALLENGES YOU FACE. LET US HELP YOU ACHIEVE YOUR GOALS.

REQUEST ONLINE OR CALL 800.346.2001
PermaGreen was founded in 1980 as a lawn care company, making its way by pushing hoses from high-volume spray rigs. Its founder, Tom Jessen, soon began developing innovative turf application technologies, such as: low volume spraying (1-Gallon per 1,000 ft), the first commercially-available injection gun system, and the first stand-on spreader sprayer, which vastly increased production numbers and reduced operator fatigue. After 6 patents and over 15,000 spreader sales, the concept has remained the same: a powerful mechanized application wastes product. Either way, you lose money. To reduce the chance of misapplication, misapplication are controlled by the Triumph’s factory-set engine speed.

Misapplication of turf products costs you money. Under-application can cause poor performance, service calls, or worse...a lost customer. Over-application wastes product. Either way, you lose money. To reduce the chance of misapplication, these are the main variables that can cause misapplication are controlled by the Triumph’s factory-set engine speed.

The Triumph’s ground-speed is factory-set to 5 MPH in high gear and 3.5 MPH in low gear. The spread width is also factory-set, so the Triumph’s spread pattern is always the same in both high speed and low speed.

SPRAYER WIDTH
The spread pattern is automatically controlled (and not adjustable), which prevents tampering with the spray output. With a flip of a valve, the operator instantly synchronizes spray to the selected ground speed.

OVERLAP
Make passes on 7 to 8-Foot centers. The spray pattern meets property for complete coverage.

CONVENIENT ERGONOMIC CONTROLS
The handlebars are angled back and down to maintain your natural hand-wrist alignment. The most frequently used controls are literally at your fingertips and can be operated without letting go of the handlebar.

OPERATED WITH HANDS ON HANDLEBAR
A. Rear Brake Lever with Parking Lock
B. Front Brake Lever with Parking Lock
C. Hopper On/Off
D. Throttle
E. Spray Trigger Lever with Lock

LESS-FREQUENTLY-USED CONTROLS
F. Deflector
G. Third Hole Pattern Adjuster
H. Kill Switch control
I. Spray selector valves

IT’S GONNA’ BE A PERMAGREEN™
Remember: the Triumph has the best application system in the industry, and that means you profit more riding a PermaGreen™

FLAT, HILLY, BIG AND SMALL...THE PERMAGREEN TRIUMPH TREATS THEM ALL

PERMAGREENS HAVE THE CRITICAL FEATURES THAT PROFESSIONALS NEED

COMMAND AND CONTROL FEATURES
Stay in control of both the machine and the applications being made:

- SmartSlee™ intuitively works behind the scenes assisting the rider in making tight turns, even on hilly terrain.
- Independent front and rear brakes apply the right amount of braking.
- Instantly synchronize both the spray and spread rates to the maximum speed for a more accurate application, every time.
- Low-profile design enhances maneuverability and stability.
- Drop-down handles enable the rider to stop off and walk difficult areas.

COMFORT FEATURES
Ride all day, every day, while being more mentally alert and physically able to crank out big production numbers:

- Ergonomic handlebars, steering and braking controls
- Low-vibration motor mounts, hand grips and foot pads
- Shock-absorbing, fully-articulated front and rear halves and cushiony tires

OTHER KEY FEATURES
- Fast enough to bid and win contracts on acreage properties
- Spread and simultaneously spray at 5 MPH, treating over 3,000-3,400 ft2 per minute in high gear. That’s a realistic 2.5 Acres per hour when treating multi-acre properties
- A trim nozzle for detailed trimming around complicated landscaping
- No boom to slow you down or get in the way of trimming.
- Remote-control pattern balancing
- Remote controlled spreader deflector
- Even small or hilly lawns are easy and quick when riding the Triumph.
- When needed, spread and simultaneously spray at 3.5 MPH, treating over 2,000-2,200 ft2 per minute in low gear. This speed provides extra time to trim around complicated landscaping, as well as, better traction and control on hills.
- The right maneuverability to navigate in and aroundornamentals without slowing down and losing time.
- Fits through a 36” gate
Is there a transport gear?

A transport gear may sound like a good idea, but it’s not needed when making 7 to 8-Foot on-center turns. These turns are easily and quickly around landscaped areas.

Why isn’t the Triumph zero-turn (hydraulic)?

The Triumph avoids the risk of cross-contamination that will catch a boom, causing possible property damage and slowing down the application.

Properties, Everyday

One Machine, All Operations. Our philosophy is "One Machine, All Operations," which means that you can use the same machine for all types of work, whether it’s for small or large properties, grass or turf care.

The Triumph is the ONE machine you need for large and small projects, and it comes with a 60-DAY GUARANTEE.

Why isn’t the Triumph zero-turn (hydraulic)?

The Triumph avoids the risk of cross-contamination that will catch a boom, causing possible property damage and slowing down the application.

Why doesn’t the Triumph have a hose/ wand?

For spot spraying, the Triumph comes equipped with a HandyClean sprayer and a Squeeze & Spray handheld applicator, which ride along with the machine or special brackets. This is far more useful than a hose and wand, because the technician can walk any distance away from the unit and spot spray up to 4,000-4,500 ft² per side with virtually no drift. Roli is easy, direct from the Triumph deck area. There is a large supply of water to mount a second Squeeze & Spray or more capacity or a second product is needed.

Why isn’t there a spray boom?

If you were only treating football fields, a boom may be useful. But, there are obstacles and obstructions (trees, shrubs, fencing, etc.) on most properties that will catch a boom, causing possible property damage and slowing down the application.

Why doesn’t PermaGreen manufacture an expanded product line (different machines for different-sized properties)?

Simple. Our philosophy is “One Machine, All Properties, Everyplace.” The Triumph is the ONE machine you need for all jobs.

How much fuel can the Triumph carry?

The Triumph can run on 4 hours on a single Gallon of gas. Hydro-driven machines have larger tanks because they use more gas, which results in higher operating costs throughout the year.

TruRPM SpECIFICATIONS & Warranty

Questions to consider before buying a different brand’s machine

How safe is the machine if I have to frequently let go of the machine with one hand to operate commonly used controls?

How do I know which products are mixing applied correctly if I have variables, such as ground speed, spreader swath, and spray pressure?

If for any reason I don’t like the machine I’m buying, will I get my money back? How long is the guarantee?

Is there a repair center nearby, or do I have to wait for repair of the machine I’m buying, will I get my money back? How long is the warranty?

If for any reason I don’t like the machine I’m buying, will I get my money back? How long is the warranty?

The Triumph can run on 4 hours on a single Gallon of gas. Hydro-driven machines have larger tanks because they use more gas, which results in higher operating costs throughout the year.

Why isn’t there a spray boom?

If you were only treating football fields, a boom may be useful. But, there are obstacles and obstructions (trees, shrubs, fencing, etc.) on most properties that will catch a boom, causing possible property damage and slowing down the application.

Why doesn’t PermaGreen manufacture an expanded product line (different machines for different-sized properties)?

Simple. Our philosophy is “One Machine, All Properties, Everyplace.” The Triumph is the ONE machine you need for all jobs.

How much fuel can the Triumph carry?

The Triumph can run on 4 hours on a single Gallon of gas. Hydro-driven machines have larger tanks because they use more gas, which results in higher operating costs throughout the year.

RECHARGEABLE SPRAY KIT
GOODBYE BACKPACK, HELLO PROFITS. ONE TRIP, ALL DONE.

EASY TO INSTALL, USE & MAINTAIN
- Sprays over 100,000 square feet per charge
- One center nozzle broadcasts 9 Feet wide
- Includes a spray gun for trimming
- The tank and pump rest inside the hopper
- Leaves 50 Pounds of dry capacity
- Perfectly balanced for comfortable operation
- Tank and entire spray system comes assembled
- Plug in at the end of the day to recharge

SPECIFICATIONS
- Tank: 2.25 Gallons
- Application Rate: 1 Quart per 1,000 ft²
- Production Capacity: 8,500 ft²
- Overall Spray Width: 9 Feet
- Spreader: LESCO® 80 Lb (not included)
- Spreader Capacity (with sprayer installed): ~ 50 Lb

SPRAY SYSTEM
- Pump: Diaphragm with Viton and Santoprene Components
- Hypro DeflecTip® Broadcast Nozzle
- Spraying Systems 22650 TriggerJet Spray Gun & Trim Nozzle
- Battery: 6-Volt, Sealed AGM
- Hopper Cover
- Battery Charger
